

LOUISVILLE REPAIR CENTER

Supporting GE Legacy Drive Systems

REPLACEMENT PARTS

Genuine Factory replacement parts for your GE Drives and Turbine Control systems are the best alternative for your peace-of-mind.

REPAIR AND RETURN

Quality repair services on a full line of GE Energy products including printed circuit boards, power supplies, SCR/Diode assemblies and selected core drives.

Includes an 18-month warranty.

REMANUFACTURED

Fastest method for receiving a reconditioned board or module - order is pulled from our legacy stock.

Better cost alternative to purchasing new parts.

Remanufactured units are fully reconditioned, tested, repackaged and carry an 18-month warranty.

EXCHANGE

Our exchange program is the same as remanufactured with the option of returning your defective repairable board within 30 days of ordering to received discount on order.

By trusting your parts and repairs services to ABB, you are ensured:

- Complete repair solutions – ISO certified
- 18-month warranty on repair services
- Developed and approved testing
- Fully Trained and Certified Technicians
- One of the lowest failure statistic rates in the board repair industry
- Automated test equipment ensuring reproducible quality
- Diagnostic test equipment certified to industrial standards

Here is the reason why **WHY CHOOSE US**

Allow ABB to be your value source for dependable, quality, replacement parts and repair service for GE legacy Drives and turbine controls. Our experience, product knowledge, access to product information and support of factory engineers enables us to provide prompt, comprehensive services, for all your GE legacy industrial drives and turbine controls.
